Location

Ratchaburi :

59/4 Moo2, Tumbon Krabyai, Amphur Banpong, Ratchaburi, 70190 ThaiInd.

220 km to Lamchaban seaport
100 km to Bangkok seaport
120 km to International Air port
127 km to HLAS (Honda Logistics Asia)
180 Km to Thai Honda Co., Ltd. (PE Factory)

Our customer

Oversea customer

- Cambodia
- Indonesia
- Sri lanka
- Loas
- Myanmar
- Philippine
- Vietnam
- UAE
- UK
- Italy

Domestic customer

- Automotive

- After market

- Agriculture

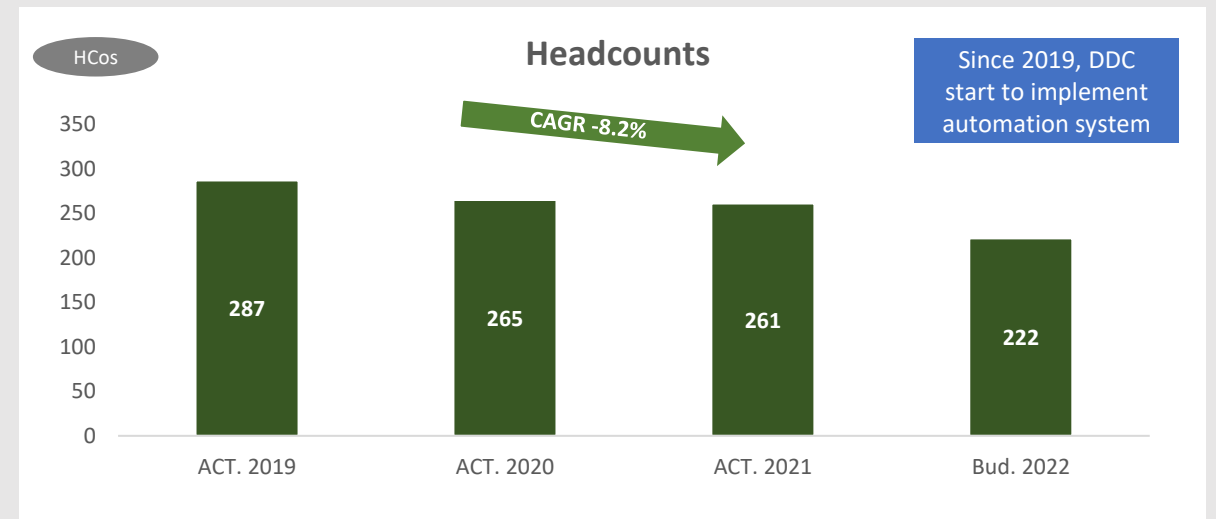

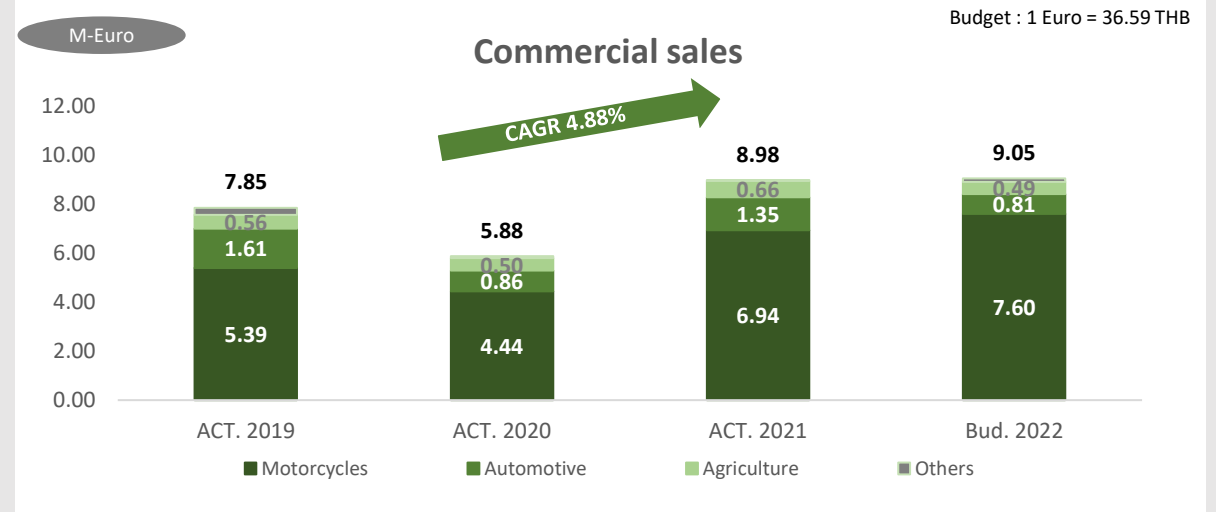

- Others

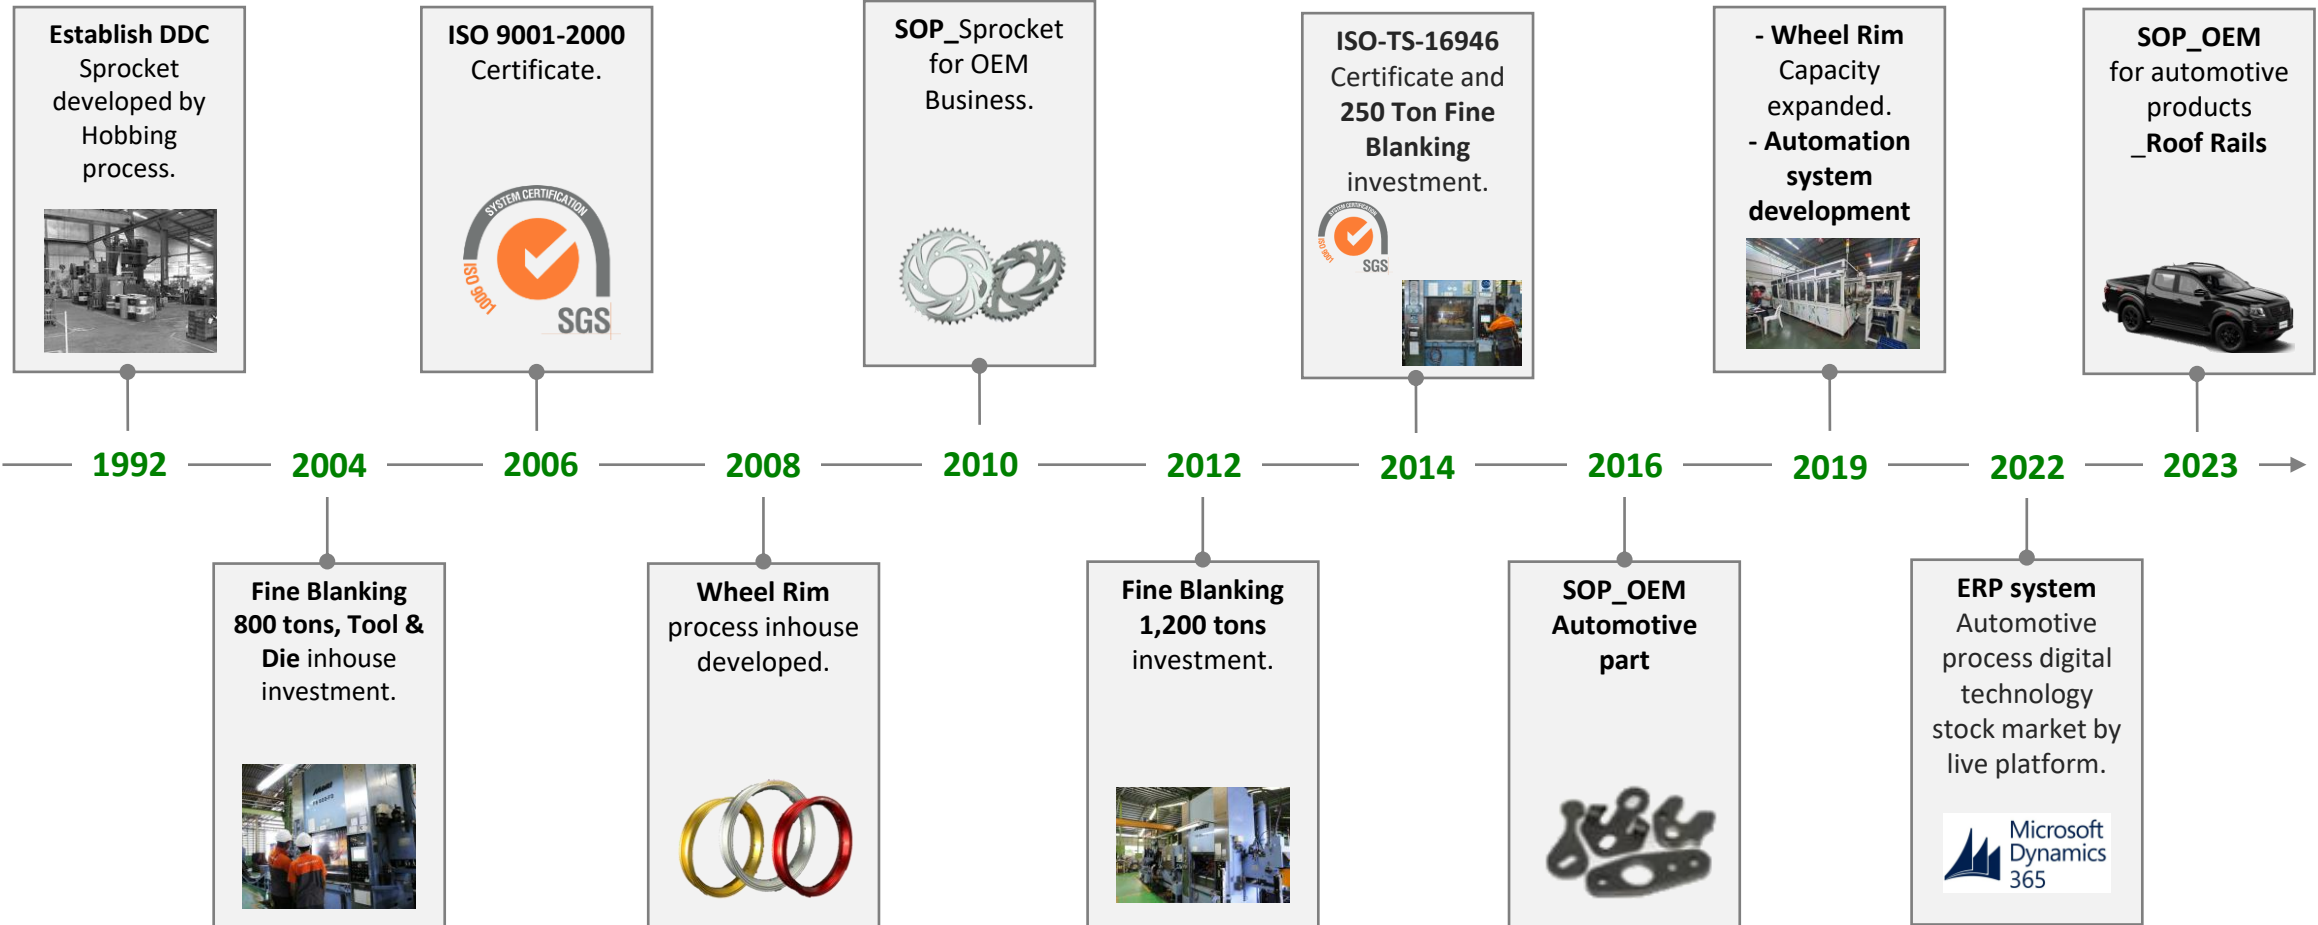

Company Overview

Key aspects.

- ▶ Land plot size : 48,000 sq.m.
- ▶ Production space : 7,300 sq.m.
- ▶ 2nd hall production available : 4,500 sq.m.
- ▶ Available space : 36,200 sq.m.
- ▶ Headcounts in 2022 (Direct & Indirect) : 222 HCos base on Nov,2022

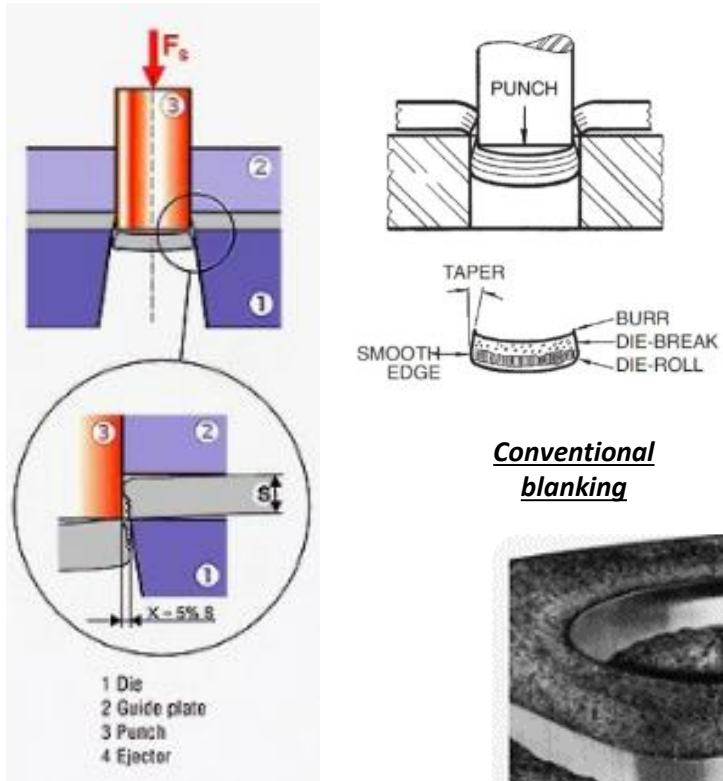

Development milestone

Core technology _ Fine Blanking technology

Conventional blanking process

Conventional blanking

Fine blanking process

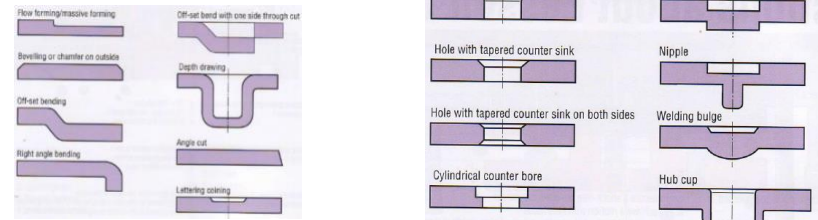

Fine blanking

The FB press uses three independently adjustable pressures (Triple Action Mode) for blanking operation.

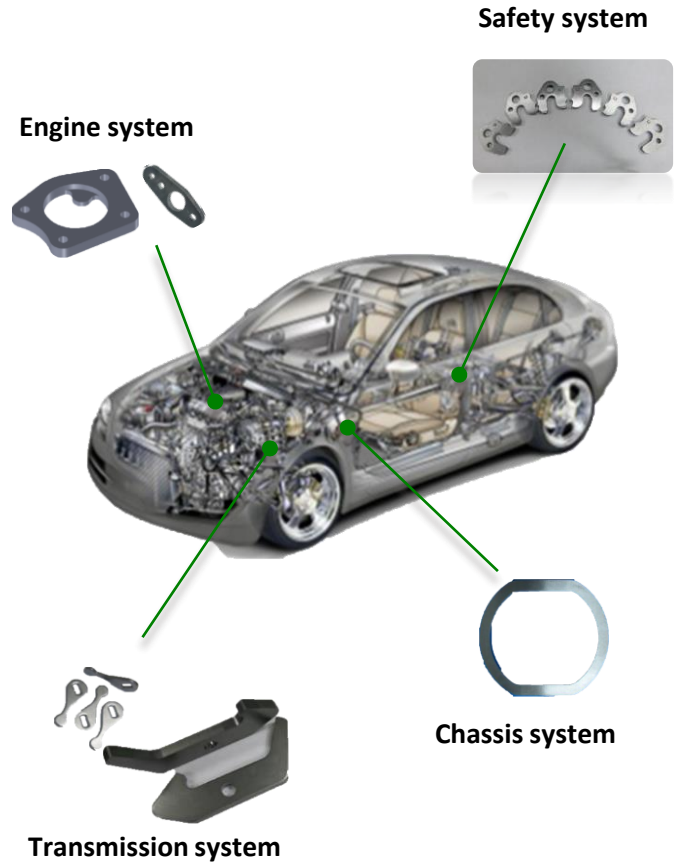

Fine blanking is a sheet metal forming process which shears the metal strip to achieve smooth edge without tear. A typical Fine blanking tool is a single-station compound tool for producing a finished part in one press stroke.

The only addition operation needed is the removal of a slight burr. The process requires a triple-action fine-blanking press. V-ring pressure, counter-pressure, and blanking pressure forces are individually and infinitely adjustable.

Our products

Automotive Products

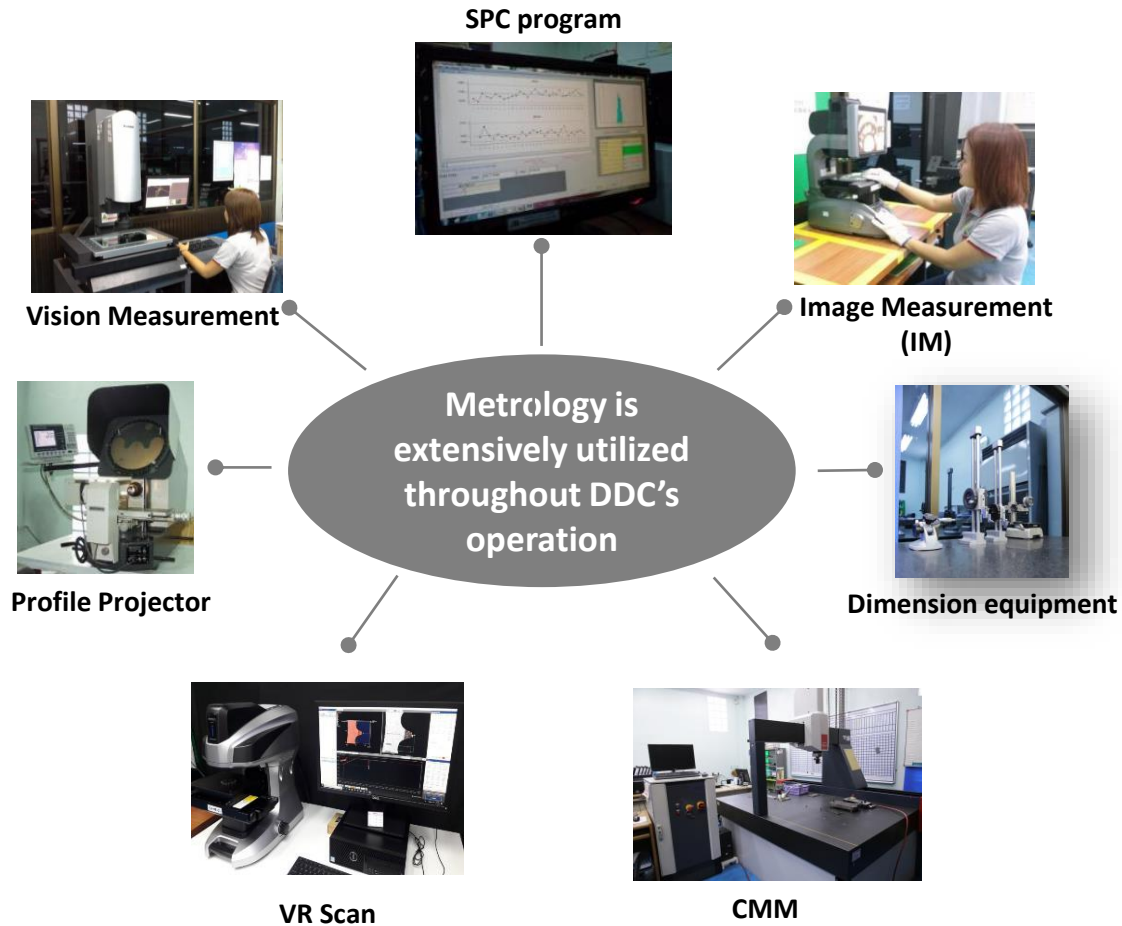

Motorcycles Products

Agriculture Products

Quality control equipment

Dyno motorcycles tester machine

Propose

- life ability function sprocket test
- Simulate load or load conditions of the motorcycle as if running on real roads
- can be selected from 1% to 100% of the load

Capacity

- Measures up to 300 HP
- Max. Axle torque up to 550 Nm
- Max. engine torque 530 Nm
- Ma. Roller torque 550 Nm
- Speed Max 300 km./hr

Green energy and CSR

Green factory by green energy

Key aspects

Since June, 2022 : DDC company start up for green energy by photovoltaic

- 1st stage for ware house area [June, 2022]
- 2nd stage for indirect office [Q-2 of 2023]
- 3rd stage for production office. [Q-4 of 2023]
- For production line, under feasibility study for ROI.

CSR activity

DDC sprocket family's donation

Blood donation activity

- Entrepreneurship

Agricultural gardening

Garden nearly house is the idea from Mr. Komdej Vichitjarusgul Chief Executive Officer of DDC Sprocket Co., Ltd. We do an agricultural gardening for ourself. We do the cultivation of organic vegetables and fruits. The objective is for everyone to have non-toxic vegetables and fruits to eat and to be healthy. And our staff can reduce some expense. We start doing garden since April 2022 until now, vegetables and fruits can be harvest.
